The ZeroFOX Platform

Protect your brand and business from threats on social and digital channels

// About ZeroFOX

The ZeroFOX Platform protects what you can’t control: your presence, reputation and information online. With online engagement at an all-time high, enterprises require protection where they do business everyday: on social media and digital platforms. ZeroFOX protects that engagement.

Using data sources across social media, surface, deep and dark web, the ZeroFOX Platform identifies and remediates threats to your brand, business, people, locations and assets. This includes targeted phishing attacks, credential compromise, account hacking, impersonations, physical threats of violence and more. As the industry leader in social media and digital risk protection, with ZeroFOX you can grow business and share securely knowing you’re protected on social and digital channels.

// Immediate Time To Value

Gain visibility
Immediately see beyond your perimeter to catch more threats faster, before they impact your business and employees.

Ensure control
Reduce your risk exposure with custom rules, takedowns and content moderation.

Automate protection
Eliminate costly, time-intensive threat hunting, manual remediation and coverage gaps that leave you exposed.

// Comprehensive Digital Risk Protection

Identify
Risks on social media, surface, deep and dark web, mobile app stores, and collaboration tools.

Protect
Your business, brand, executives, employees, corporate assets, locations, domains, and data.

Remediate
Threats to your employees, executives, customers, products, revenue and reputation.
// ZeroFOX Solutions

**Enterprise Protection**
ZeroFOX identifies, analyzes and remediates threats across social and digital platforms that threaten your organization.

**Brand Protection**
Engage with followers and generate new leads safely knowing you are protected against account hacking, slander and reputational risks.

**Executive and Employee Protection**
Protect your executives and employees by identifying impersonators, account hacking attempts and spearphishing attacks.

**Location and Event Protection**
Secure offices, facilities and events from physical and digital threats with alerts delivered directly to your phone.

**Deep and Dark Web Protection**
Monitor and alert on information leakage and credential compromise shared on deep and dark web sites and chat rooms.

**Web and Domain Protection**
Protect your web and social experiences by finding and eliminating domain squatting and typo phishing.
